Part 1

Har doim ABC tanlash (checkbox)

Questions 1-8

You will hear some sentences. You will hear each sentence twice. Choose the best reply to each sentence (A, B or C) .

1

- ☐ A What is his name?
- ☐ B I believe my aunt.
- ☐ C Do I know her?

Part 2

Gap fillin \missing information

Questions 9-14

You will hear someone giving a talk. For each question, fill in the missing information in the numbered space. Write **ONE WORD** and / or **A NUMBER** for each answer.

- Start date: 9
- Day the club will meet: 10
- Time: from 4:20 to 11
- Teacher's name: Mr 12
- Teacher's phone number: 13
- Place: 14

Part 3

Matching information

Test 1 - Part 3

For questions 15-18, choose from the list (A-H) what each person says about it. Use the letters only once.

- A - They lied about something.
- B - They were injured.
- C - They were made redundant at work.
- D - They were issued a warning.
- E - They were doing a number of different things.
- F - It affected their career choice.

- 15 Speaker 1
- 16 Speaker 2
- 17 Speaker 3
- 18 Speaker 4

Part 4

Map labeling

Select

Test 1 - Part 4

You will hear someone giving a talk. Label the places (19-23) on the map (A-G).
There are **TWO** extra options which you do not need to use.

- 19 Car park 3
- 20 Changing room
- 21 First-aid center
- 22 Café
- 23 Lifejackets

Questions 24-29

You will hear three different extracts. For questions 24-29, choose the answer (A, B or C) which fits best according to what you hear. There are two questions for each extract.

24 Extract One: What is Colin's opinion of their new boss?

- ☐ A She fails to consult with colleagues.
- ☐ B She is too keen to establish new working practices.
- ☐ C She has little understanding of the organisation's history.

25 Extract One: When talking about the problem, Eva is

- ☐ A Trying to suggest that it is unimportant.
- ☐ B Comparing alternative ways of solving it.
- ☐ C Encouraging Colin to take a more positive attitude to it.

Part 6

Gap filling (input)

Questions 30-35

You will hear a part of a lecture. For each question, fill in the missing information in the numbered space. Write no more than **ONE WORD** for each answer.

Brad says there are no 30 to warn extreme snowboarders of dangers.

Brad advises snowboarders always to follow the 31 when descending.

Brad always wears a 32 when he goes into the mountains.

According to Brad, you need a lot of 33 to set off down the mountain.

Brad particularly enjoys doing several 34 when he is going down a slope.

Brad says at first he found it difficult to do a good 35 on steep slopes.

Reading

Part 1

Gap filling (input)

Questions 1-6

Read the text. Fill in each gap with **ONE** word. You must use a word which is somewhere in the rest of the text.

Sea turtles are amazing animals. Sea 1 lived in our oceans for millions of years. However, today, these 2 face many dangers. One of these 3 comes from non-natural light. When baby sea turtles, also called hatchlings, come out of their eggs, they need to find the ocean quickly. They usually do this by following the natural 4 of the Moon and stars reflecting off the water. But in many places, artificial lights – from streets, buildings, and homes are much brighter than the 5 . These lights can confuse 6 sea turtles and make it hard for them to find their way to the ocean. This causes them to lose their way and head toward the land instead of the sea. When this happens, the baby turtles can get lost, dehydrated, or even be eaten by other animals.

Questions 7-14

Read the texts 7-14 and statements A-J. Decide which situation described in the statements matches with the given texts. Each statement can be used **ONCE** only. There are **TWO** extra statements which you do not need to use.

- A - You want to do different leisure activities with your family.
- B - You need a rural escape for the purpose of The Romantic Retreat.
- C - You take your children and parents to spend a holiday watching waves.
- D - You need a hotel in a city center during your business trip.
- E - You need a place that is convenient to take adventures.
- F - You want to stay away from the rural area.
- G - You want to have some information about the past.
- H - You need a hotel that is friendly for the environment.
- I - You have limited budget so you need a reasonable hotel.
- J - You need a hotel to organize a seminar.

- 7 Nestled in the heart of bustling London, The Mayfair Hotel offers a stylish and sophisticated experience. Enjoy breathtaking views of the city from your modern room, savor delicious cuisine at our award-winning restaurant, and explore iconic landmarks just steps away. Perfect for business travelers or those seeking a vibrant urban adventure. Select an option
- 8 Escape to the sun-drenched shores of the Mediterranean at The Coral Beach Resort. Relax on pristine beaches, dive into crystal-clear waters, and indulge in luxurious spa treatments. This all-inclusive resort offers a range of activities for all ages, from water sports to themed evenings, creating unforgettable memories. Select an option
- 9 Looking for a fun-filled vacation? The Adventureland Hotel is your perfect choice. This family-friendly resort boasts a thrilling waterpark, a petting zoo, and a dedicated kids' club with engaging activities. Enjoy spacious family suites, delicious meals, and create lasting memories with your loved ones. Select an option
- 10 This charming hotel in the French countryside offers breathtaking views of rolling vineyards and peaceful gardens. Enjoy candlelit dinners, intimate spa treatments, and leisurely walks through picturesque landscapes. This is the perfect escape for couples seeking tranquility and romance. Select an option
- 11 Experience the rich history of Rome at The Imperial Hotel. This historic building houses elegant rooms adorned with antique furniture and artwork. Explore the city's ancient ruins, visit world-class museums, Select an option

Questions 15-20

The reading passage has six paragraphs, Q15-Q20. Choose the correct heading for each paragraph from the list of headings below.

Write the correct number, A-H, as your answer to each question.

- A - Circles on the Water
- B - Ancient Ancestor
- C - Different Explanations
- D - Unexpected Invention
- E - Solution to the Problem
- F - Hidden Menace
- G - Artificial Eye
- H - Significant Benefits

- 15 Chocolate chip cookies were actually a mistake! One day in 1903, Ruth Wakefield, while baking a batch of cookies, noticed she was out of bakers' chocolate! As a substitute she broke some semi-sweetened chocolate into small pieces and put them in the dough. She thought that the chocolate would melt in the dough and the dough would absorb it. When she opened up the oven, she realized she had invented the tasty treat called chocolate chip cookies!
- 16 Computers originally began as calculators. The first calculator was made by Blaise Pascal. It only had eight buttons, and it could only do addition and subtraction. There was a set of wheels, and all of the wheels had the numbers zero through nine on them. The wheels were connected by gears and each turn of one wheel would turn the next wheel one-tenth of a turn. This machine was completed in 1642 when Blaise was twenty-one years old.
- 17 A helicopter has a big advantage over an airplane, especially when people might be trapped in a tight place like on a mountain, where there is not much space to land, or on the water. They are also used for rescuing people from burning buildings or from trees when there are floods. Without the helicopter as a rescue vehicle, many people would lose their lives because the rescuers would be unable to reach them if they were in a difficult area.
- 18 Cars have always caused air pollution. In the past, there was a lot more air pollution created by cars than there is today. In the future, there will probably be even less. Two good ways for pursuing the dream of less air pollution are cars that run on solar energy and cars that run on fuel cells. Solar energy and fuel cells do not cause pollution because they do not give off greenhouse gases.

Deadly humid heatwaves

Deadly humid heatwaves

Life-threatening periods of high heat and humidity will spread rapidly across the world with only a small increase in global temperatures, a study has found, which could cause a sharp acceleration in the number of deaths resulting from the climate crisis. The extremes, which can be fatal to healthy people within six hours, could affect hundreds of millions of people unused to such conditions. As a result, heat deaths could rise quickly unless serious efforts to prepare populations were undertaken urgently the researcher said.

Normally, the human body cools itself by producing sweat, which evaporates and takes heat away. But when humidity is high, evaporation is induced. The study used a limit based on experiments on people showing that when combined heat and humidity, as measured by so-called wet bulb temperature, passes 31.5°C, the body is no longer able to cool itself. The researchers called this threshold "non-compensable heat stress", as sweating cannot compensate for the extreme conditions. Without cooling aids, such as cold water, fans or air conditioning, death is likely within hours.

The research analysed data from thousands of weather stations across the world to show that 4% had already experienced at least one six-hour period of

Questions 21-24

For questions 21-24, choose the correct answer A, B, C or D.

- 21 What is the main concern highlighted in the study regarding global temperatures?
- ☐ A High temperatures will remain stable, with little impact on human health.
 - ☐ B Long seasons of hot and damp weather will spread quickly, causing more deaths.
 - ☐ C The increase in global temperatures will have no effect on the climate crisis.
 - ☐ D The number of deaths resulting from climate change will decrease with a rise in temperatures.
- 22 What does the researcher suggest could happen unless urgent efforts are made to prepare populations for extreme heat?
- ☐ A Heat deaths could decrease rapidly.
 - ☐ B Millions of people could adapt to the conditions without issues.

The History of Cod Liver Oil

The History of Cod Liver Oil

Cod liver oil is a type of fish oil used today for general health purposes, but northern European fishing communities used cod liver for centuries before the doctors and chemists of 19th-century Europe began to take an interest. Its manufacture was simple: the livers of the codfish were left for some days, then oil was taken from them. The oil grew darker according to how long the livers were left, resulting in three grades of oil: pale, light-brown and dark-brown.

Ludovicus Josephus de Jongh of the Netherlands produced the first extensive chemical analysis of cod liver oil in 1843. His studies of the three grades of oil led him to conclude that the light-brown oil was the most healthy. He attributed this superiority to the larger quantities of iodine, phosphate of chalk and volatile acids found in it.

In 1846, de Jongh traveled to Norway to obtain the purest oil available. By the 1850s, 'Dr. de Jongh's Light Brown Cod Liver Oil' was marketed throughout Europe and exported to the United States. Each bottle had de Jongh's signature and stamped seal on it – a blue codfish on a red shield – guaranteeing that the product was 'put to the test of chemical analysis'. Advertising emphasized de Jongh's credentials as a doctor and chemist, and included testimonials from other men of science and medicine.

levels of certain substances. Every bottle featured de Jongh's 32 and an official seal showing a blue codfish on a red shield, assuring buyers that the oil had undergone chemical testing. The oil had unpleasant taste and smell, so it was commonly mixed with 33, though some suggested consuming it with tomato ketchup instead.

Questions 34-35

For questions 34-35, choose the correct answer A, B, C or D.

- 34 What was a key factor in the success of Scott and Bowne's cod liver oil product?
- ☐ A They successfully promoted the product through advertising.
 - ☐ B Leading physicians publicly supported the product.
 - ☐ C Their product was more affordable than others on the market.
 - ☐ D They were the pioneers in selling cod liver oil in Asian markets.
